## Abstract

A clear and well-documented  $\text{\LaTeX}$  document is presented as an article formatted for publication by CEUR-WS in a conference proceedings. Based on the “ceurart” document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

## Keywords

keyword 1, keyword 2, keyword 3

## 1. Introduction

Introduce the context, motivations, and goals of your project.

The paper is organized as follows: Section 2 describes our approach; Section 3 explains our experimental setup; Section 4 discusses our main findings; finally, Section 5 draws some conclusions and outlooks for future work.

## 2. Methodology

Describe the methodology you have adopted, the architecture of your system, your workflow, etc.

## 3. Experimental Setup

Describe the experimental setup, i.e.

- used collections
- evaluation measures
- url to git repository and its organization
- hardware used for experiments
- ...

 CEUR Workshop Proceedings (CEUR-WS.org)

## **4. Results and Discussion**

Provide a summary of the performance on the previous year dataset.

Discuss the results and any relevant issues.

## **5. Conclusions and Future Work**

Provide a summary of what are the main achievements and findings.

Discuss future work, e.g. what you may try next and/or how your approach could be further developed.
